

Sign Crossroads in Global Perspective Semioethics and Responsibility

“This book is a welcome addition to the power of semiotics to change the world, not through any ideological or theoretical framework, as in political movements, but by its uncanny ability to allow people to get to the meaning of things. Susan Petrilli is a giant in the field and, like very few others, knows the global village is expanding in sign-based ways. It is these ways that need to be deciphered and understood, so that life in the village can be truly harmonious.”

—Marcel Danesi, University of Toronto; Editor-in-Chief, *Semiotica*

Language is the species-specific human version of the animal system of communication. In contrast to non-human animals, language enables humans to invent a plurality of possible worlds; reflect upon signs; be responsible for our actions; gain conscious awareness of our inevitable mutual involvement in the network of life on this planet; and be responsibly involved in the destiny of the planet.

The author looks at semiotics, the study of signs, symbols, and communication as developing sequentially rather than successively, more synchronically than diachronically. She discusses the contemporary phenomenon that people in today's society have witnessed and participated in, as part of the development of semiotics. Although there is a long history preceding semiotics, in a sense the field is, as a phenomenon, more “of our time” than of any time past. Its leading figures, whom Petrilli examines, belong to the twentieth and twenty-first century. Petrilli theorizes that the task for semiotics in the era of globalization is nothing less than to take responsibility for life in its totality.

Praise for Sign Crossroads in Global Perspective

“The present volume features a series of brilliant essays by the highly respected and internationally renowned Italian scholar, Susan Petrilli. The eight studies are representative of her work in semiotics, semioethics, and her interpretation the work of many of the illustrious pioneers of the inter-discipline of semiotics. The chapters in this collection typify her ability to explicate complex theoretical ideas in clear, lucid, and comprehensible prose. Scholars worldwide will welcome this collection of her essays on these timely topics because they add to our basic knowledge of them. Their clarity of purpose and originality make this volume one that every scholar in semiotics and interdisciplinary studies should possess.”

—Frank Nuessel, University of Louisville

“It is impossible for me to imagine a more lucid, informative, and insightful treatment of such central but somewhat elusive topics than the essays in this volume. Such topics as responsibility, bodies, translation, and the origin of language are explored here not only in depth and detail but also with clarity and precision.”

—Vincent Colapietro, Pennsylvania State University
